

FOR IMMEDIATE RELEASE

Twin City Fan Augments Energy Initiatives Team

February 3, 2016

Twin City Fan Companies is pleased to announce that Wade Smith will join the Twin City Fan Companies' **Energy Initiatives** team as an outside consultant. In this role, Wade will help the corporation adapt to the new U.S. Department of Energy Commercial and Industrial Fan and Blower rule as well as help educate customers in order to understand the impacts of the rule on their businesses.

Wade recently retired after five years as the Executive Director of the Air Movement and Controls Association (AMCA.) During that time, Wade served as the lead negotiator between AMCA and the U.S. Department of Energy, and was the main liaison to the Lawrence Berkley National Labs. Wade's presence means TCF enjoys the services of three members of the DOE Fan Rule negotiating team. Trinity Persful, the Twin City Fan Marketing director, notes "We are extremely excited to have Wade join our team. His knowledge of the DOE rule and how it affects our business will be extremely important for our customers."

Twin City Fan Companies is committed to helping the industry understand and navigate the upcoming regulatory waters. Wade Smith augments an already robust DOE regulatory department and brings years of experience to the organization.

The list of applications that utilize our products is practically endless and ranges from heavy duty custom fans for industrial applications to custom OEM fans to a wide variety of HVAC supply and exhaust fans for the commercial plan and spec market.

For more information please contact Trinity Persful at 931-638-5186, email tpersful@tcf.com or visit Twin City Fan Companies at www.tcf.com.
